DIGITAL ESTATE

Who wants to live forever? Our data stays online even when we ourselves have passed away. How can we manage our digital estate?

NOTES FOR MULTIPLIERS

In the course of this workshop, participants will explore the topic of “Digital Estates”. In a first step, the basics of “Digital Estates” will be discussed: What is a “Digital Estate”? Which data do people leave behind? Participants will then receive tips and assistance on how to manage their own digital estate.

Only 18% of Germans have their digital estate sorted. This means that the relatives of the deceased have to deal with the data that is left behind. If however, people deal with their digital estate before they pass away, they can save their relatives a lot of grief and stress.

The core statements of the workshop are therefore:

1. A digital estate encompasses more than one might think at first glance. Photos and purchased music are also included.

2. On the Internet, there are a multitude of offers that can help you with your digital estate.

3. Digitalization is changing people’s perspective on death. With the help of the digital estate (e.g. photos), relatives can commemorate the deceased in a new way.

4. An effective method of regulating a digital estate is a “legacy contact”. This is a trusted person who has access to one’s digital estate or parts of it in the event that the its owner passes away.
**PEOPLE GO, DATA STAYS**

**PROCEDURE**

“Welcome to our workshop on “Your Digital Estate”. Who wants to live forever? Our data makes us immortal on the Internet. But what happens to our data when we die? And what should you do to manage things while you are alive? You can find the answers to these questions in the following workshop.”

**TASK**

“What do you think of when you hear the terms ‘estate’ or ‘heir’? Present your ideas to the group.”

**POSSIBLE SOLUTION**

“I think of my will and the arrangements I made regarding my property, such as jewelry, cars or money etc.”
WHAT DOES “DIGITAL ESTATE” MEAN?

PROCEDURE

“Every day we leave behind a multitude of digital footprints. Those footprints do not go away – even after we die. Nevertheless, only 18% of users in Germany manage their digital estate. But what exactly is a ‘digital estate’ anyway?”

TASK

“Have you ever heard the term ‘digital estate’? Compare your understanding with the one in the module.”

POSSIBLE SOLUTION

“I knew it was about electronic data, but I didn’t know that included photos and messages.”
**PROCEDURE**

The moderator switches to the picture of a desktop. If something is said that is explained in the graphic, the moderator moves the mouse to the appropriate position and reads the explanatory text. He/she should do the same even if not all picture elements are addressed. “We are looking at a desk. But it is not just any desk.”

**TASK**

“It shows us what digital data remains after someone dies. What data can you discover?”

**POSSIBLE SOLUTION**

“Accounts, photos and documents that were saved, e-mails and chats live on even after we have passed away.”
“People have used places such as cemeteries to remember their deceased loved ones for centuries. However, the Internet offers other ways of remembering the deceased such as for example, online condolence books or digital gravestones.”

“Watch the video and take a stance: do you think digital gravestones make sense? Why? Why not?”

“I think it’s a good idea, because it allows you to understand the life of a deceased person.”, “I think the grave is a bit macabre.”
REST IN PEACE 2.0

PROCEDURE

“I will show you how you can manage your digital estate on Facebook. This is how you do it:

- Log into Facebook with your password
- Click on your own name
- Click Settings
- Click General
- Click Manage Account
- Enter the name of the person you want to manage your digital estate and click Add.”

TASK

Try it out! Specify a legacy contact on Facebook.

POSSIBLE SOLUTION

See the sequence “Managing Your Digital Estate on Facebook”
“Now you know that your data is not simply deleted after you die. And you also know what you can do if you want to settle your digital estate beforehand.”

The moderator asks the participants to position themselves on the subject of digital estates. Ask some of the following questions.

“What have you learned? What was new for you? What will you tell your family and friends about what you have learned? What would you like to try out?”

“I am going to choose a trustworthy person to settle my digital estate when I am gone.”
