## POSSIBLE USES

The interactive “storytelling” format can be used in many different ways. Simply adapt it to your individual needs. Whether in self-study or as part of a longer workshop – everyone can find the format that is perfect for them.

## FORMATS

Every impulse from the module can be used individually or in combination with other content. The special media formats offer suggestions for self-directed learning and numerous topics for discussion.

The videos are great as an introduction to a topic and as a stimulus for discussion.

Impressive images and graphics illustrate the content.

Links at the end of each chapter provide you with additional information on other websites.

On the home page of [dabei-geschichten.telekom.com/en](https://dabei-geschichten.telekom.com/en), the menu item “Downloads” will lead you to further module-specific documents.
